SUMMARY

Senior Frontend Engineer with 6+ years of experience building production web applications with Vue, Nuxt.js, TypeScript, React, and Next.js. From 2022 to 2026, I worked with a US-based remote team on Vue/Nuxt applications, a reusable Vue component library, and a Chrome extension listed with 40,000 users. Experienced with browser extensions, Shadow DOM, state management, API integration, testing, and asynchronous product delivery.

EXPERIENCE

Senior Frontend Engineer - Sazito

Jun 2022 - Present | Part-time

Technologies: React, Next.js, TypeScript, Redux, Redux Saga, REST APIs, Tailwind CSS

- Build and maintain storefront and admin features for Sazito's online store builder using React, Next.js, TypeScript, and Redux.
- Implemented product import workflows for CSV and XLSX files, including async job states, expired downloads, and upload error handling.
- Built customer-review management screens, rating flows, image uploads, and responsive admin tables.
- Added and maintained payment settings, shipment tracking, marketing attribution, product search, and quick-add-to-cart workflows.
- Modernize a large legacy React application in small changes while keeping active storefront and admin behavior intact.

Frontend Engineer - Jack Westin (US-based remote team)

Jun 2022 - Jun 2026

Technologies: Vue 3, Nuxt.js, TypeScript, Pinia, Chrome Extensions, Shadow DOM, Storybook, Vitest, Cypress

- Built Vue 3 and TypeScript features for a Chrome extension listed with 40,000 users, including its injected study side panel.
- Implemented login and subscription states, written and video solution views, daily-passage and live-session resources, and retake flows.
- Used Shadow DOM and Web Components to keep injected interfaces and styles isolated from third-party pages.
- Worked on messaging, storage, caching, analytics, and error reporting across content scripts, background code, and extension UI.
- Built and tested reusable Vue components in a shared library with Storybook, Vitest, Vue Test Utils, Playwright, and MSW.
- Delivered public-site and student-product features across Nuxt applications, including navigation, billing, study-plan, and marketing flows.

Frontend Developer - Chamedoon

Apr 2020 - Jun 2022

Technologies: Vue.js, Nuxt.js, Vuex, TypeScript, JavaScript, REST APIs, Sass

- Built customer-facing Vue and Nuxt features from product requirements and API specifications.
- Created responsive interfaces with Sass and maintained Vuex state for data-driven workflows.
- Worked with backend and product teammates to handle API errors, debug production issues, and ship fixes.

SKILLS

Core: Vue 3, Vue.js, Nuxt.js, TypeScript, JavaScript, HTML, CSS, Sass, Tailwind CSS

State and APIs: Pinia, Vuex, REST APIs, Authentication, Browser Extension Messaging

Testing and UI: Vitest, Cypress, Playwright, Vue Test Utils, Storybook, MSW, Web Components, Shadow DOM

Tooling: Vite, Webpack, pnpm, Git, ESLint

EDUCATION

Bachelor of Software Engineering - University of Ilam, Iran Graduated 2012
