SUMMARY

Senior Frontend Engineer with 6+ years of experience building production web applications with React, Next.js, TypeScript, Vue, and Nuxt.js. At Sazito, I work across storefront and admin products for an online store builder, including product import, payments, customer reviews, shipment tracking, and marketing attribution. I also spent four years with a US-based remote team building edtech web applications, shared UI components, and a Chrome extension listed with 40,000 users.

EXPERIENCE

Senior Frontend Engineer - Sazito

Jun 2022 - Present | Part-time

Technologies: React, Next.js, TypeScript, Redux, Redux Saga, REST APIs, Tailwind CSS, Webpack

- Build and maintain storefront and admin features for Sazito's online store builder using React, Next.js, TypeScript, and Redux.
- Implemented product import workflows for CSV and XLSX files, including async job states, expired downloads, and upload error handling.
- Built customer-review management screens, rating flows, image uploads, and responsive admin tables.
- Added and maintained payment settings, shipment tracking, marketing attribution, product search, and quick-add-to-cart workflows.
- Worked across REST API integrations, authentication-aware UI, form-heavy admin tools, internationalized storefronts, and custom Webpack builds.
- Modernize a large legacy React application in small changes while keeping active storefront and admin behavior intact.

Frontend Engineer - Jack Westin (US-based remote team)

Jun 2022 - Jun 2026

Technologies: Vue 3, Nuxt.js, TypeScript, Chrome Extensions, Shadow DOM, Storybook, Vitest, Cypress

- Built frontend features across Nuxt applications and a Chrome extension listed with 40,000 users.
- Implemented extension login and subscription states, written and video solution views, resource cards, and retake flows.
- Worked on messaging, storage, caching, analytics, and error reporting across browser-extension contexts.
- Built reusable components and Web Component outputs in a shared Vue library, with Storybook and automated tests.
- Collaborated asynchronously with product, design, backend, and QA teammates in a US-based remote team.

Frontend Developer - Chamedoon

Apr 2020 - Jun 2022

Technologies: Vue.js, Nuxt.js, Vuex, TypeScript, JavaScript, REST APIs, Sass

- Built customer-facing Vue and Nuxt features from product requirements and API specifications.
- Created responsive interfaces with Sass and maintained Vuex state for data-driven workflows.
- Worked with backend and product teammates to handle API errors, debug production issues, and ship fixes.

SKILLS

Core: React, Next.js, TypeScript, JavaScript, HTML, CSS, Sass, Tailwind CSS

State and APIs: Redux, Redux Toolkit, Redux Saga, React Router, REST APIs, Authentication

Testing and UI: Jest, Playwright, Cypress, Storybook, Component Libraries, Responsive UI

Tooling: Webpack, Vite, Babel, pnpm, Git, ESLint

AI-assisted development (ChatGPT (Codex), Claude, Gemini, Cursor, GitHub Copilot): Applied AI-assisted development workflows to plan features, review code, improve accessibility, write tests, resolve merge conflicts, and organize file structures and routes while validating all production changes.

EDUCATION

Bachelor of Software Engineering - University of Ilam, Iran Graduated 2012
